MICROFIBER TOWEL

The fabric (commonly polyester and polyamide/ nylon) is the width of the yarn that passes horizontally through the fabric from one side to the other. The fabric is started by manipulating the knitting needles to form horizontal loops over each other. This one continuous thread makes the fabric produce an incredibly stretchy fabric. It can usually be made by hand or using a knitting machine. Weft knitting is the most common form of knitting because it is simpler than warp knitting (another form of knitting).

MICROFIBER GLASS CLEANING TOWEL

- Use dry to attract dust and dirt particles, and wet to wipe away dirt and debris from all washable surfaces using only water.
- Fold the cloth so you have eight clean sides to work with. Wipe with even strokes.
- When using on easily scratched surfaces such as brushed stainless steel, first test microfiber towel on an inconspicuous spot.

CHENILLE CAR WASH CLOTH

Chenille is the name for both the type of yarn and the fabric that makes the soft material. The threads are purposefully piled in creating the yarn, which resembles the fuzzy exterior of the caterpillar. Chenille is a woven fabric that can be made from a variety of different fibers. Chenille yarn and fabric are fixtures in fashion and home decor, and the soft, fluffy textile has a unique history and manufacturing process.

MODERN WAREHOUSE FACILITIES

AND EFFICIENT LOGISTICS

Efficient logistics and modern warehouse facilities play a crucial role in our foreign trade business.

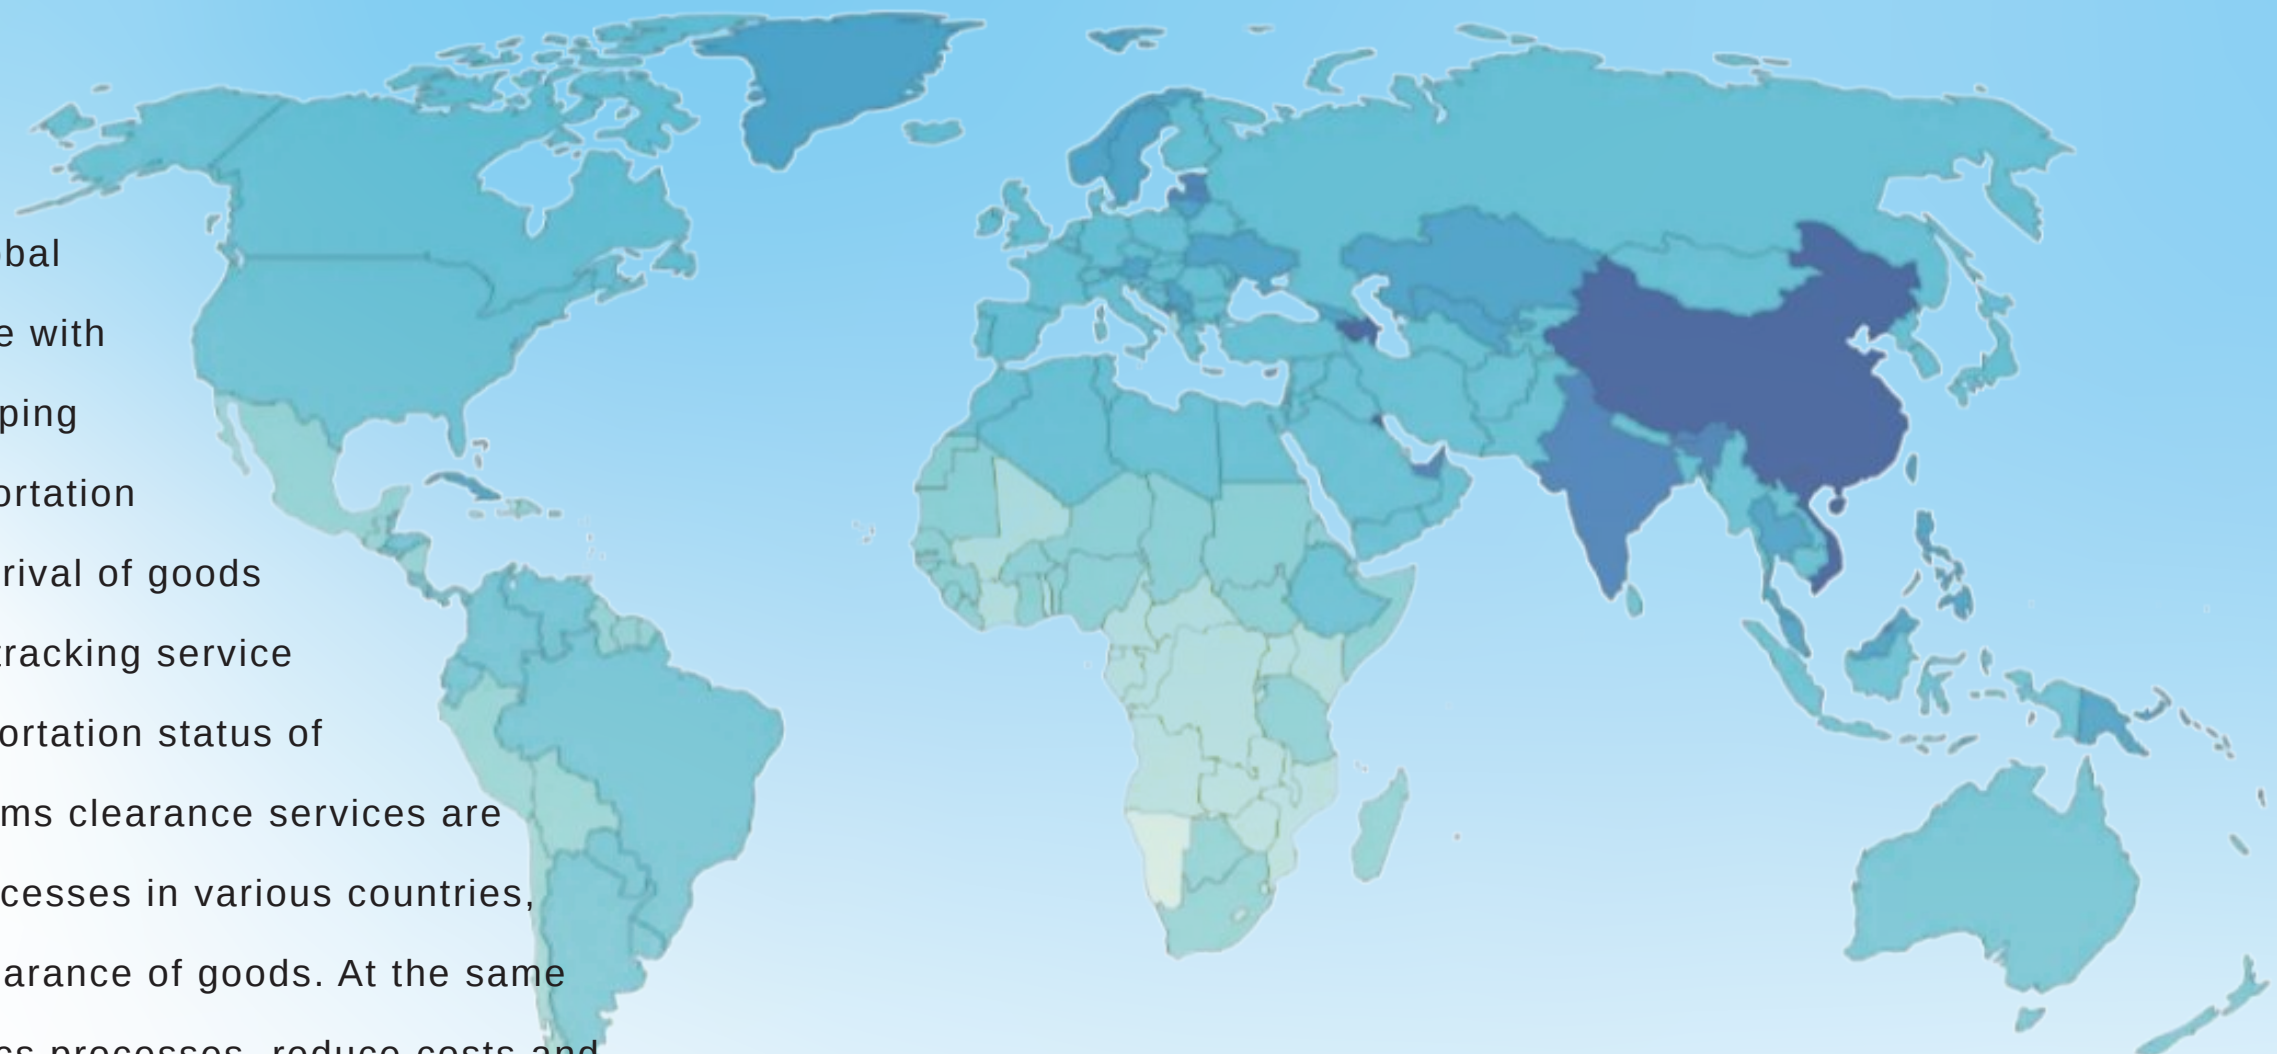

WAREHOUSE

With over 30500 m² space, equipped with advanced storage equipment and monitoring and fire prevention systems, the warehouse is spacious, clean and well ventilated. Adopting advanced inventory management system, real-time monitoring and management of goods, strictly implementing the first in, first out system, it provides accurate and efficient logistic inventory reports. We also provide a range of value-added services, such as cargo packaging, labeling, sorting, assembly, etc. to meet personalized efficient logistics and modern warehouse needs. There are also specialized facilities and management plans for goods with special storage conditions.

LOGISTICS

Our logistics services have a wide global transportation network and collaborate with multiple well-known international shipping companies, railways, and land transportation suppliers to ensure timely and safe arrival of goods at their destination. The full logistics tracking service allows you to keep track of the transportation status of goods at any time. Professional customs clearance services are familiar with customs policies and processes in various countries, helping to ensure smooth customs clearance of goods. At the same time, we continuously optimize logistics processes, reduce costs and improve efficiency, and develop optimized logistics solutions for you.

In short, our logistics and warehouse services will provide solid support for your importing and exporting business, creating an one-stop solution that allows your goods to arrive at port of destination worldwide.

A kitchen scene featuring three folded cleaning cloths on a countertop. The first cloth is solid light blue. The second is white with a grey and blue diagonal striped pattern. The third is white with a green grid pattern and a green border. A yellow sponge is visible on the left. In the background, a white car is parked outside the kitchen window.
